

CORRES. CONTROL  
OUTGOING LTR NO.DOE ORDER #  
05-RF-00831

## Rocky Flats Environmental Technology Site

August 31, 2005

05-RF-00831

Colorado State Land Board.  
Attn: Beverly Rave  
FAX: 303-866-3377REQUEST FOR ACCESS TO STATE LAND FOR SURFACE SOIL INVESTIGATION  
DCS-044-05

The United States Department of Energy and Kaiser-Hill Company, LLC are requesting access to the following location on State Land Board lands for the purpose of conducting a surface soil investigation.

N 39° 52' 59.2" W 105° 13' 41.5"

This location was identified by an aerial scan as potentially containing radionuclides at low levels but above background. As part of the process to complete the investigations of areas potentially contaminated by Rocky Flats activities, we request access to conduct investigative activities that could include ground-based radiation surveys and/or shallow surficial soil sampling. It is not expected that vehicle access will be required or that any noticeable soil disturbance will occur.

We accept the responsibility for the safety of our workers while they are on your land. We expect the work would be completed within three weeks of receiving your permission to proceed. If you would like to know the results of the investigation, we would be happy to share them when they are available.

Please fax your response to us at 303-966-7991.

If you have any questions, please call David Shelton at 303-966-9877
